Cumulative Respiratory Virus Reports: Table of contents

Figure1: Weekly influenza notifications by type and percentage of positive tests by week of testing. Referred testing from all jurisdictions is included.

Table 1: Weekly notifications of influenza viruses by type (influenza A, influenza B) and week.

Figure 2a: Weekly notifications of all respiratory viruses by type (influenza A, influenza B, RSV, Parainfluenza 1234, HMPV) - stacked. Referred testing from all jurisdictions is included.

Figure 2b: Weekly notifications of all respiratory viruses by type (influenza A, influenza B, RSV, Parainfluenza 1234, HMPV) - line graph. Referred testing from all jurisdictions is included.

Figure 3: YTD Weekly notifications of influenza (FLUA&B) by age group and gender.

Figure 4: YTD Weekly notifications Respiratory Syncytial Virus (RSV) by age group and gender.

Figure 5: YTD Weekly notifications Parainfluenza 1 virus (PARA1) by age group and gender.

Figure 6: YTD Weekly notifications Parainfluenza 2 virus (PARA2) by age group and gender.

Figure 7: YTD Weekly notifications Parainfluenza 3 virus (PARA3) by age group and gender.

Figure 8: YTD Weekly notifications Parainfluenza 4 virus (PARA4) by age group and gender.

Figure 9: YTD Weekly notifications Human Metapneumovirus (HMPV) by age group and gender.

Figure 10: YTD Weekly notifications Adenovirus virus (ADEN) by age group and gender.

Figure 11: YTD Weekly notifications Rhinovirus virus (RHINO) by age group and gender.
